## The Modern Cinematic Glossary

All The Film-Making Terms You Need To Know

AI Video Bootcamp

# Camera & Composition Terms

### Framing

How subjects are arranged within the edges of the screen to create meaning or balance.

### Montage

A series of short clips edited together to show the passage of time or development.

### Blocking

The careful arrangement of actors and movement within a scene by the director.

### Jump Cut

An abrupt cut that creates a jarring effect, often used to show a time skip.

### Boom Mic

A microphone mounted on a long pole used to capture sound while staying out of frame.

### Match Cut

A seamless transition between two similar visual elements or actions across two shots.

### Soft Focus

A slight blurring of the image to create a dreamy or romantic atmosphere.

### Rack Focus

A shift in focus during a shot to draw attention from one subject to another.

### Chiaroscuro

A lighting technique that uses strong contrasts between light and dark to create dramatic mood.

### Dutch Angle

A tilted camera shot that creates a sense of unease or disorientation in the viewer.

### Tracking Shot

A smooth camera movement that follows a subject through the scene.

### Practical Lighting

Using real light sources visible in the scene, like lamps or candles.

### Extreme Close-Up

A shot that tightly frames a subject, focusing on fine details like eyes or hands.

### Over-the-Shoulder Shot

A perspective shot from behind a character's shoulder, typically used during conversations.

# Camera & Composition Terms (Continued)

### Tilt

A vertical camera movement up or down on a fixed base.

### Pan

A horizontal camera movement from a static position.

### Zoom

Changing the camera lens to magnify or shrink the subject within the frame.

### Cutaway

A brief shot that interrupts the main action to show supporting detail.

### Whip Pan

A fast horizontal camera movement used for dynamic transitions or to reveal surprises.

### Voiceover

Narration by a character or narrator that plays over the visual content.

### Low Angle

A shot from below looking up, making the subject appear powerful or dominant.

### Wide Shot

Captures the entire subject within the frame and emphasizes setting or scale.

### Insert Shot

A close-up of an object to draw attention to a detail.

### High Angle

A shot from above looking down, often used to make subjects appear vulnerable.

### Reverse Shot

Used in dialogue scenes to switch perspective between speakers.

### Handheld Shot

A shaky camera style that adds realism or urgency.

### Eye-Level Shot

The camera is positioned at the subject's eye level, creating a neutral perspective.

### Establishing Shot

A wide shot at the start of a scene that provides context or setting.

AI Video Bootcamp

# Production & Post-Production Terms

### Cameo

A brief appearance of a well-known figure in a minor role.

### Close-Up

A tightly framed shot of a subject, usually a face, to show emotion.

### Crane Shot

A high moving shot from a crane, often used to swoop over a scene.

### Voice Match

Re-recording dialogue to match the original delivery, often used in post-production.

### Medium Shot

Shows a character from the waist up, balancing emotion and context.

### Green Screen

A background replacement technique using chroma key effects.

### Cross-Cutting

Editing between different locations to show parallel action.

### Depth of Field

The range of distance within a shot that appears acceptably sharp.

### Color Grading

The process of altering and enhancing the color of a film during editing.

### Overexposure

An image that is too bright due to too much light hitting the camera sensor.

### Diegetic Sound

Sound that originates from the world of the film, like dialogue or footsteps.

### Underexposure

An image that is too dark due to too little light being captured.

### Ambient Sound

Background noise that sets the scene's atmosphere.

### Non-Diegetic Sound

Sound not heard by characters, such as a music score or narrator.

AI Video Bootcamp

# Editing & Sound Terms

### J Cut

When audio from the next scene begins before the image appears.

### Foley

Custom-recorded sound effects added in post-production to enhance realism.

### L Cut

When the audio from a previous scene continues into the next visual scene.

### Two-Shot

A frame that includes two characters, often used in conversation scenes.

### Storyboard

A sequence of drawings that plan out each shot of a film.

### Overcranking

Recording at a higher frame rate, which when played at normal speed, results in slow motion.

### Undercranking

Recording at a lower frame rate to create a fast-motion effect.

### Point of View (POV) Shot

Simulates the vision of a character, putting the viewer in their shoes.

# Lighting & Exposure

### Chiaroscuro

Strong contrast of light and shadow for mood.

### Practical Lighting

Using visible sources like lamps on screen.

### Overexposure

Too much light in the frame.

### Underexposure

Too little light, resulting in darkness.

### Soft Focus

Slight blur to create dreamlike effect.

### Color Grading

Altering color for mood and continuity.
